# OUR SERVICES (TERRALOGIC)

# IT Solutions Services that connect you to your users

**Cloud services:** Cloud hosting services that perfectly fit small and large businesses.
- Desktop as a service.
  - Being one of the top providers, we facilitate continuous improvement, on cloud services adoption/migration, and automation as per your business requirements.
  - Hassle-free and cost-optimized remote working.
    - With Cloud virtual desktop services you can manage cost effectively, and ofcourse software located in a centralized location for IT departments. We update, manage, and if needed change your operating systems swiftly and efficiently. Administrators can install patches, drivers, and other related applications from remote locations. Companies can get the benefits of an uninterrupted workforce which only enhances overall productivity and business continuity. With cloud VDI services, testing and troubleshooting of new programs and applications will be easier.
  - Virtual Hosting Service
    - Our cost-effective Cloud Desktop Services hosts Desktop operating systems, software, and applications in a single, centralized, remote desktop location with Virtual desktop infrastructure (VDI).
  - Remote Desktop (DaaS)
    - Get all the line-of-business software across a wide range of industries like tax, finance, accounting quickbook, law, healthcare, software development, and more – all with a smooth desktop experience.
  - Cloud IT Infra
    - The modern business needs a capable cutting-edge virtual IT infrastructure with minimal disruptions. Terralogic helps to host your virtual desktop systems in our most-developed data centers across the globe.
  - Terralogic Advantage
    - Today, enterprises need to be equipped with an agile and scalable solution to accommodate potential business discontinuity due to unforeseen circumstances. They are exploring alternatives to traditional workstation, which could enable workers to safely access everything they need from virtually any device, without requiring specific hardware. Terralogic's remote workspace solution enables seamless connectivity to your mobile workforce. A user accessing our DaaS solution remotely can securely access their virtual desktop, files, applications and data. Our cloud-based infrastructure setup lets your workers safely access everything they need from virtually any device, without requiring specific hardware

**Cybersecurity services:** An intelligent cyber partner to enhance your Cybersecurity Services posture by improving the core security.

- One-stop solution for your Security Requirements.
- Managed Detection & Response
  - With the power of AI and human expertise, we detect, analyse, and respond to threats proactively to provide cohesive defense and central monitoring.
- Threat & Vulnerability management
  - We Identify, classify, remediate, and mitigate high-risk areas through an iterative process to secure the crown jewels of the organization.
- Governance Risk & Compliance

- Security Implementation Service
  - A powerful security implementation services to safeguard your assets from evolving digital threats.
- Our Mission
  - We provide 360˚ Cybersecurity Services offerings tailored-made to meet customers' requirements. We adopt an AI security approach to achieve a proactive state of cyber maturity & resiliency.
- Our Security Capabilities
  - Data Privacy and protection.
  - Cloud Security.
  - Threat Hunting.
  - Incident management.
  - Compromise assessment.
- Our Approach
  - Our threat detection methodology aligns with the cyber kill chain framework and strictly follows the industry standards like ISO 27001, ISO 27701, NIST, PCI-DSS, and SOC 2 Type II.
- Our Partners
  - BeyondTrust
  - Azure
  - Stellar Cyber
  - Paloalto
  - Fortinet

**System and Software services:** Creating scalable engineering solutions with an agile architectural backbone.

- Your dedicated system software partner to meet your enterprise goals, process faster, and maintain your market advantage.
- DevOps
  - We provide integrated solutions so that you can eliminate manual steps, reduce errors, and scale faster by automating release cycles and, service virtualization.
- Quality Engineering
  - We work with you to ensure QA execution is always up to the mark. Right from defining the test requirements, test strategy, planning, and execution, we cover it all.
- Embedded Services
  - With us, you get new-age embedded software development services like ASIC, FPGA, and DSPs, etc, and all software, hardware, mechanical, and PCB needs.
- Data Engineering
  - We mine data, treat, and repeat the same process until it yields results for initiating new businesses, advising strategic changes, or accessing new markets.
- Our Approach
  - Define: We deep-dive into your enterprise goals to get to the heart of the criteria, maintaining a macro-view while researching trends and evolving patterns.
  - Develop: We like to isolate our goals in the form of narrow, actionable check-points arranged in the form of a development roadmap to track progress and execution.
  - Deploy: We lead intuitive design practices to achieve our clients' organizational goals and create products and services that users love.
- Our Partners:
  - Microsoft (Gold partner)
  - Dell EMC
  - QNX
  - Rubrik

# TECHNOLOGIES WE WORK FOR

- **IoT:** Connected IT solutions for products, devices, wearables and vehicles.
- **AR/VR:** An end-to-end cutting edge technology to create immersive experiences.
- **AI/ML:** AI/ML impelled IT solutions Services to deliver accuracy to your business judgements
- **Data Science:** Solutions to extract precise business insights to let you make informed decisions.
- **Blockchain:** Leading technology coupled with AI to revolutionise your business transactions.

# AWARDS AND RECOGNITION

- DNA Paris Design Honorable Mention 2024.
- A' Design Award Sliver Winner 2024.
- The fastest-growing private company in the US in 2023.
- Redefining Trends of IoT Through Digital Transformation.
- The Finest Fintech App Development Companies 2020.
- Top Mobile App Development Companies of 2020MMI® Level3 maturity for India & Vietnam.
- UX UI Design Leader Companies of 2020.
- Interface Design Europe Award Winner of 2019.

# WHY WORK WITH US

- Agile
  - Keeping customers at the centre of the service delivery is in our traits. Our quick turnaround time and proactive approach assist our clients to rehearse the future and outperform the competition.
- Smart
  - Our machine first approach empowers you to bypass the repetitive manual tasks. Greater levels of automation through Artificial Intelligence, Cognitive capabilities and data analytics bring efficiency and competitive edge.
- Scalable
  - When we solve business challenges, we envision solutions that can be scaled. Our dynamic resourcing calibration can replicate any solution for a much larger playing ground, creating compelling digital experiences.
- Cost-effective
  - Our flexible, reliable and efficient service delivery sets us apart from the rest and helps our clients perform to the best of their capacities in this competitive market environment, adding value to every level.
